Important Aspects in designing the curriculum

- **Choice-based credit system**
- **Philosophy of regulatory bodies** (AICTE model Curriculum – 2018 and National Education Policy - 2020)
- **Use of available technologies and resources in a more efficient manner** through a combination of different learning schemes, such as, Blended, Flip, Experiential, Skill based, etc.
- **Interdisciplinary and futuristic program curriculum** with emphasis on sustainability, AI and machine learning, and automation, etc. all being necessary knowledge areas in the era of Industry 4.0

Inter-Disciplinary and Specialized courses

Experiential Learning

- **Practice schools [PS]**

Aims to enable relevant industry exposure and practical (hands-on) experience in core areas of interest.

- PS-I (1st Sem): Industrial Visits (5-6 companies)
- PS-II (Summer, after 4th Sem): Opportunity to work in small module
- PS - III (8th Sem): Opportunity to work on live projects. Also provide students with career direction, entrepreneurial motivation, and enhanced understanding of choice of electives in Final year

- **100 hours of Coding**

- **Joy of Engineering courses**

- **Project based learning**

- **Concept of LTP**

(Lecture, Tutorial and Practical) is changed to LDP (Lecture, Discussions and Projects).

- **International Academic Collaboration**

University of Aston, Birmingham City university, Saint Mary's College of California, University of AGDER, University of Michigan, Purdue Northwest University

- HACK-BMU
- Inter-disciplinary Projects
- Smart India Hackathon
- NGO and Start up Project such as SABUDH Foundation, Niti Aayog
- Outside Classroom activities Workshop on design thinking and entrepreneurship skills and soft skills

Some Salient features

- **Fractional credit system**

Accommodate Interdisciplinary courses, Flexibility to incorporate range of courses, and pre-requisite of any other course, Opportunity to teach through MOOCs

- **Holistic learning and personal development opportunities**

Skill based and prospective courses such humanities, liberal arts etc.

- **Option for branch change at the end of 1st Sem**

Different courses offered in B.Tech (CSE)

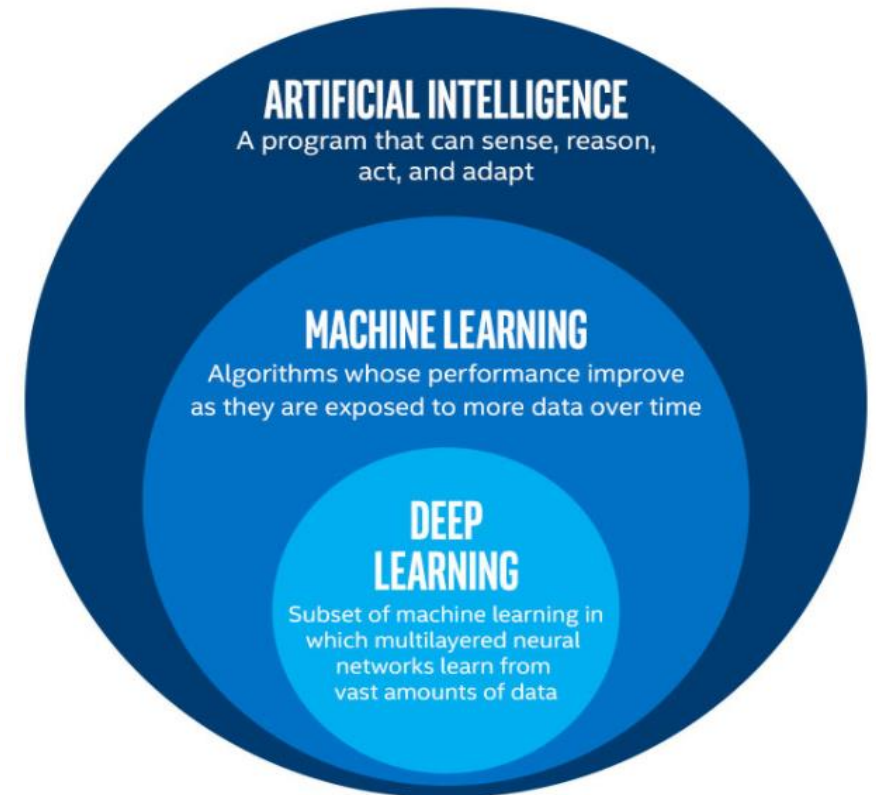

- Artificial Intelligence (AI)
- Machine Learning
- Deep Learning-Tensor flow
- Data Science
- Big Data Analytics
- Cyber Security
- Internet of Things (IOT)
- Block Chain
- Natural language processing (NLP)

** The Lab is equipped with machines with latest configuration and uses the recent state of art software (such as MATLAB, Python, Prolog, Packet tracer, Stanford Parser etc.) to train students.

Courses in Collaboration with Industries

- Machine Learning - Sabudh Foundation
- Cyber Security - Data Security Council of India (DSCI)
- Intelligent Cloud Hub – Microsoft
- IOT-Intel
- Mobile Application Development- IBM
- Cyber Security Carleton University, HackerU (Israel),

Centre of Excellence and Labs

High Performance Computing Centre

High-performance computing is the use of parallel processing and supercomputers to run advanced and complex application programs.

Microsoft Intelligent Cloud Hub

The dedicated AI infrastructure and Internet of Things (IOT) hub programme skill students in AI and cloud technologies

**BML
MUNJAL
UNIVERSITY**

is now associated with

Microsoft Intelligent Cloud Hub

to further enrich skills and expertise in

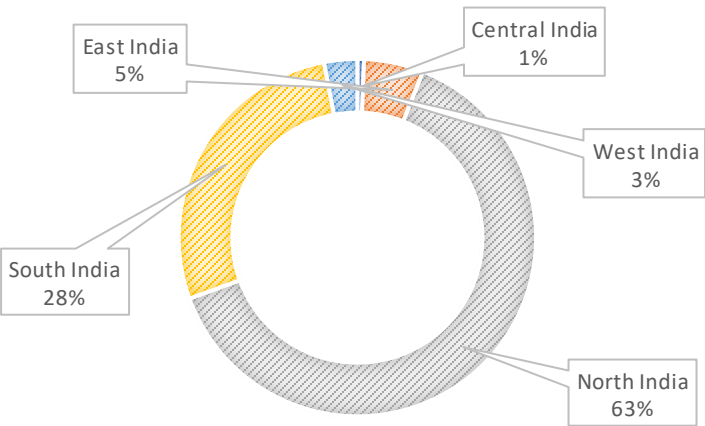

- Artificial Intelligence
- Data Science
- Internet of Things
