Solar power or other innovative usage

- **Solar Cells-**Grid connected photovoltaic power system of 246 KW capacity.
- **LED Lights-**Whole the campus area is equipped with LED lighting for less energy consumption.
- Natural Light Usage-The design of academic & library building allows more day light usage decreasing energy consumption.
- Air Cooled Chiller with adiabatic technology- 650TR of air cooled chiller instead of water with invertor technology which save water & electricity.
